

## Your Programming Environment | Lesson 3

# Practice: Manipulating Git and GitHub

### Instructions

You will practice using Git for version control. Follow the instructions in the following tasks.

### Setup

1. A **GitHub** repository named [software-dev-course-programEnvironment-to-do-list](#) has been created and contains a file named **tasks.txt**. Fork the repository.
2. Clone the repository to your local machine.
3. Make changes to the file by opening it and adding the following:
  - Complete Git lesson
  - Review HTML basics
  - Start JavaScript exercises
4. Stage the change.
5. Commit your changes.
6. Push your changes to your own GitHub repository.

### Submission

Submit the url for your GitHub repo in the field below.
